00. introduction

```
Data Sciences Institute | Python
```

Intro to course support team

- Technical Facilitator: Julia
- Learning Support Staff: Kasra
- Learning Support Staff: Tianyi

Rules of engagement

- Please mute yourself when you join the Zoom session. If you have a question, please raise your hand and unmute yourself!
- Questions are encouraged – as as we go – this is your opportunity to understand the material!
  - Ask the chat and our learning support can answer
  - I will pause periodically to answer questions out loud
  - #dsf1-help channel on Slack
  - Optional office hours and work periods

Schedule

Week	Tuesday	Wednesday	Thursday	Friday
Week 1	Live Learning Session 1 (Introduction, Data Types, Error)	Live Learning Session 2 (Functions, Strings, Converting Types, Input)	Live Learning Session 3 (Control Flow)	Work Period 1
Week 2	Live Learning Session 4 (Reading/Writing, Object Oriented Programming)	Live Learning Session 5 (numPy and pandas)	Live Learning Session 6 (Case study)	Work Period 2

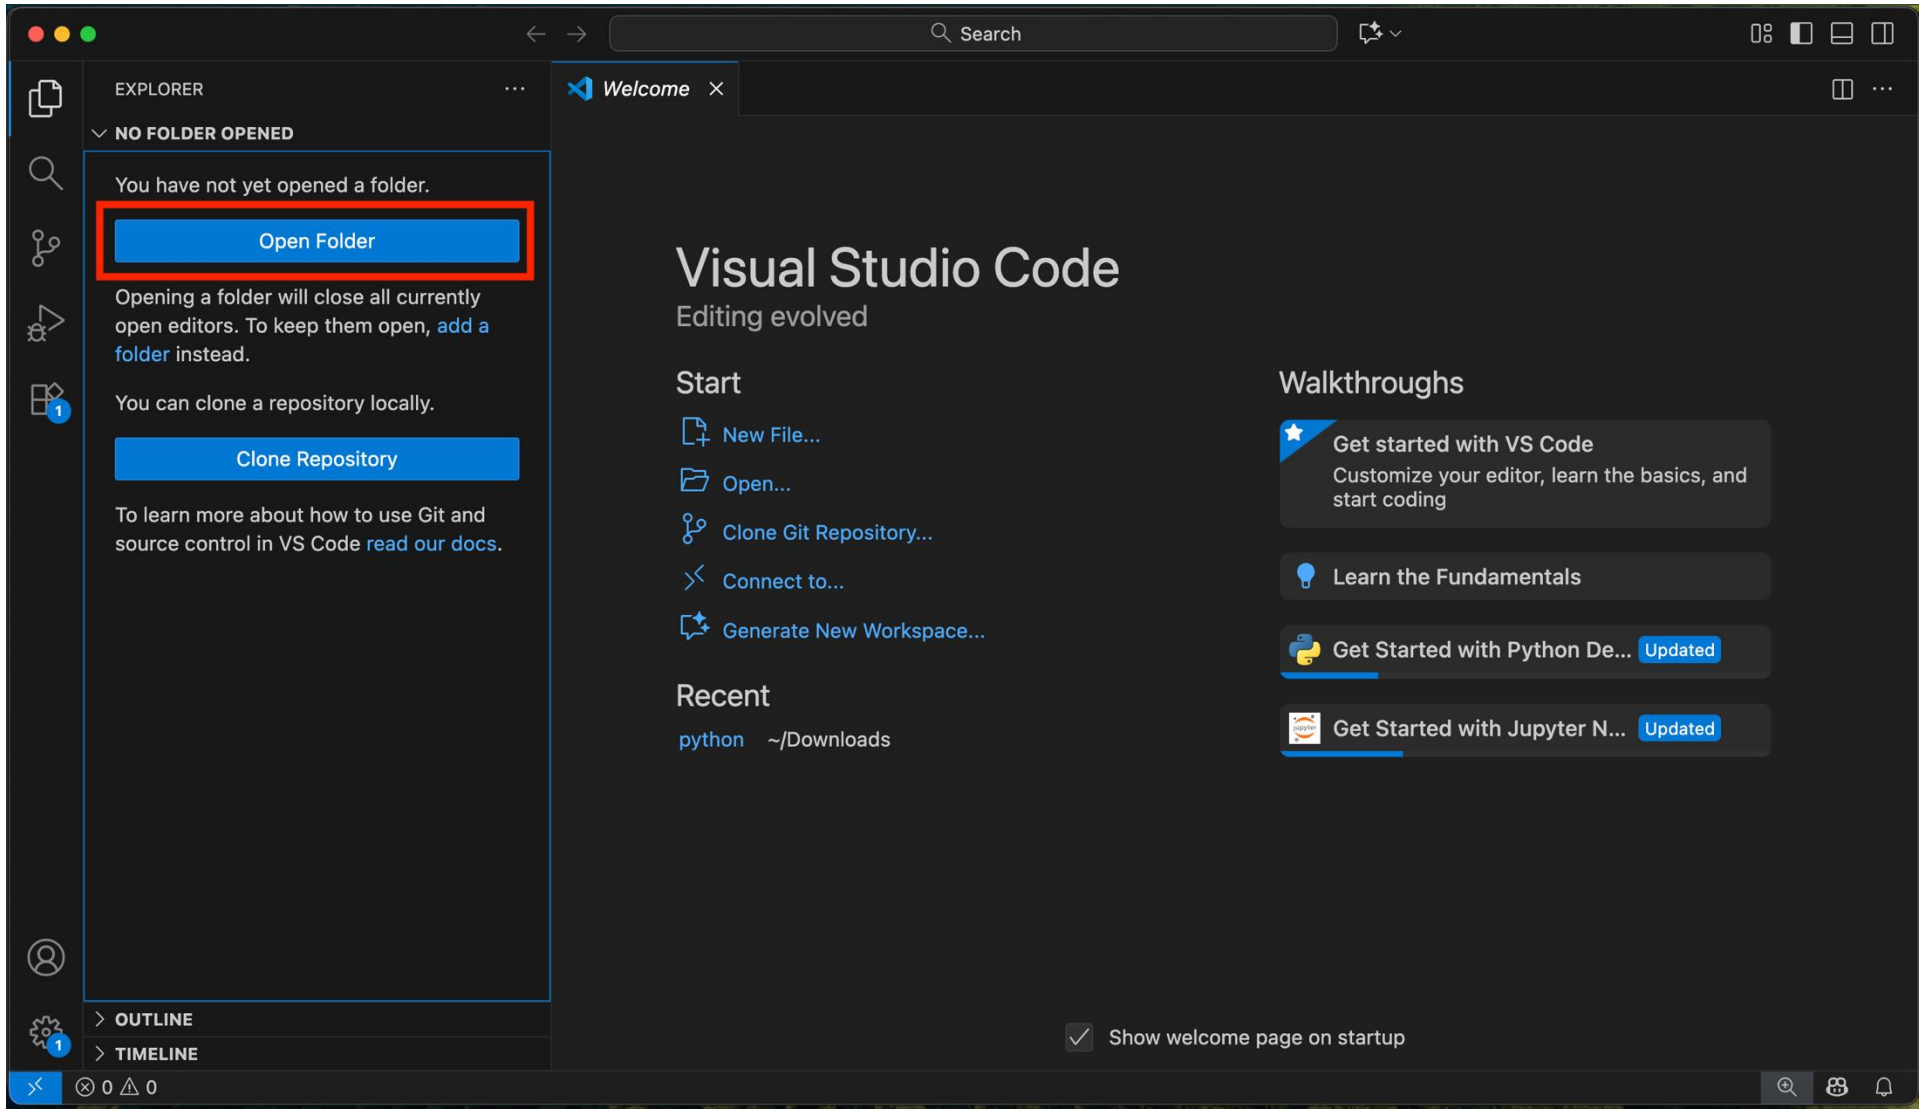
Let’s navigate the Python repo

- https://github.com/UofT-DSI/python

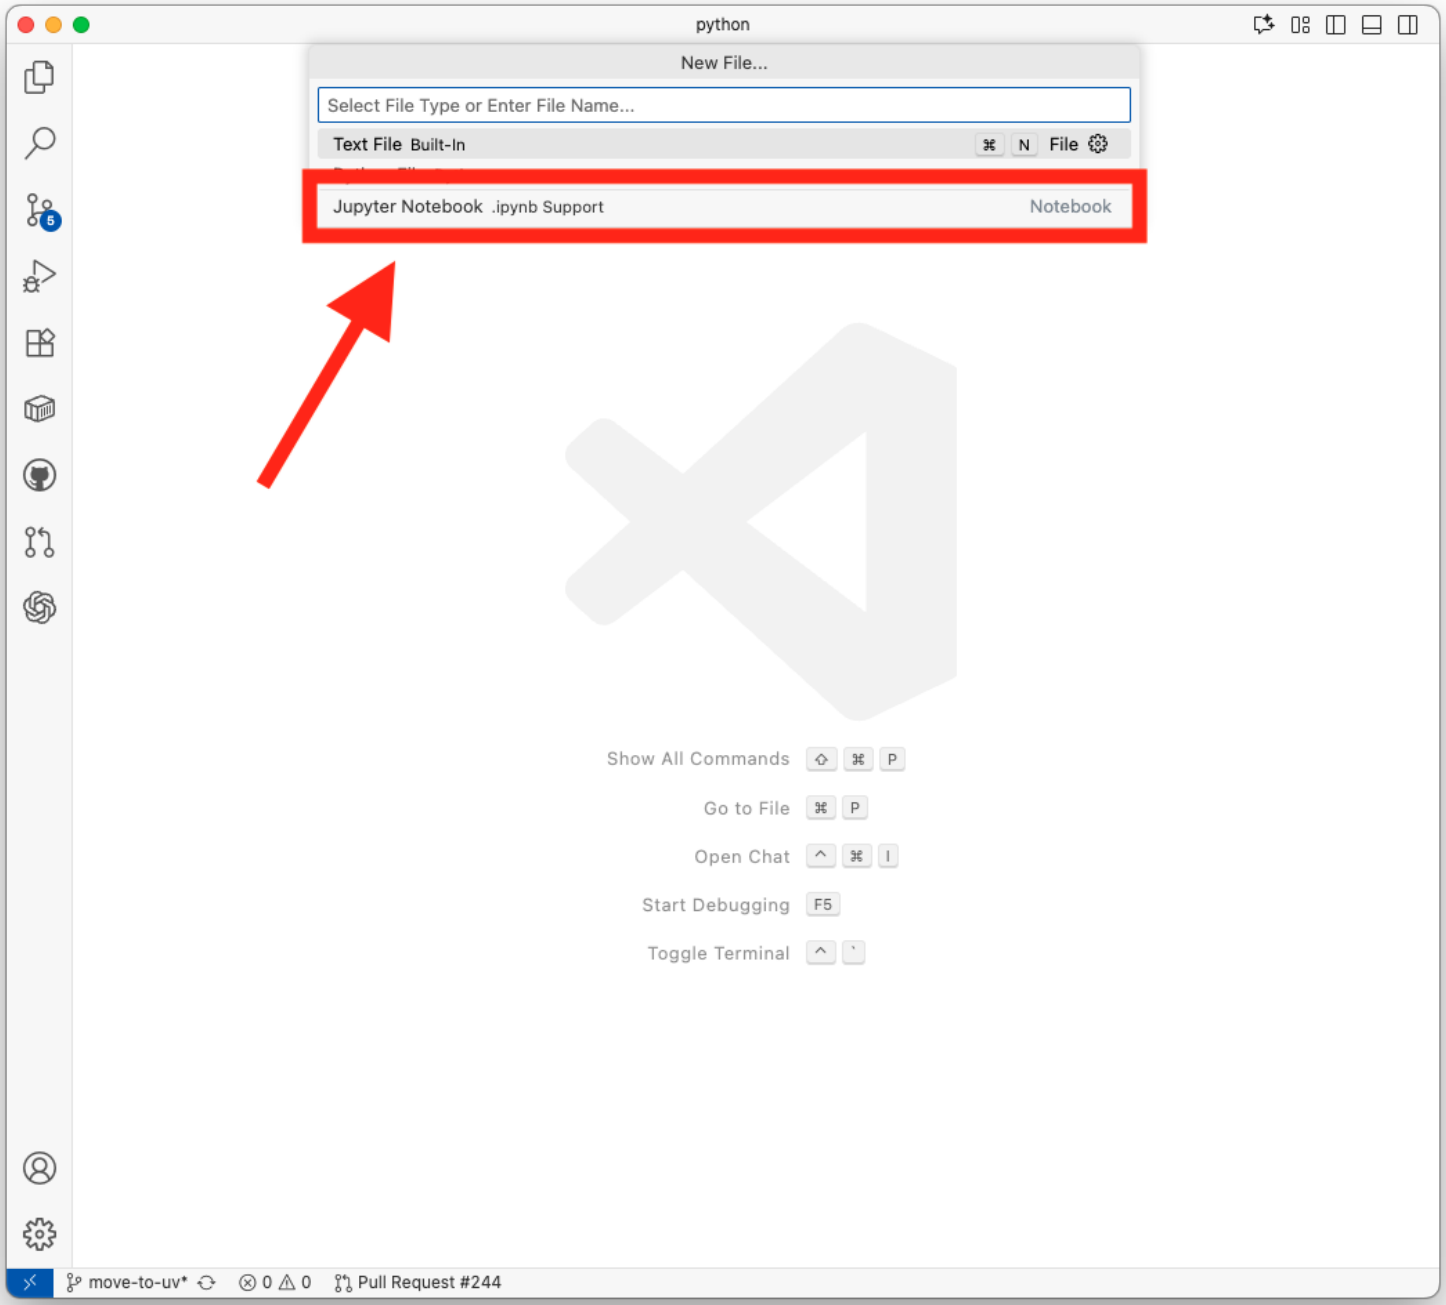
Getting set up

- Follow the SETUP.md instructions
  - https://github.com/UofT-DSI/python/blob/main/SETUP.md
  - *Note:* make sure you create your virtual environment in the repo folder you cloned!

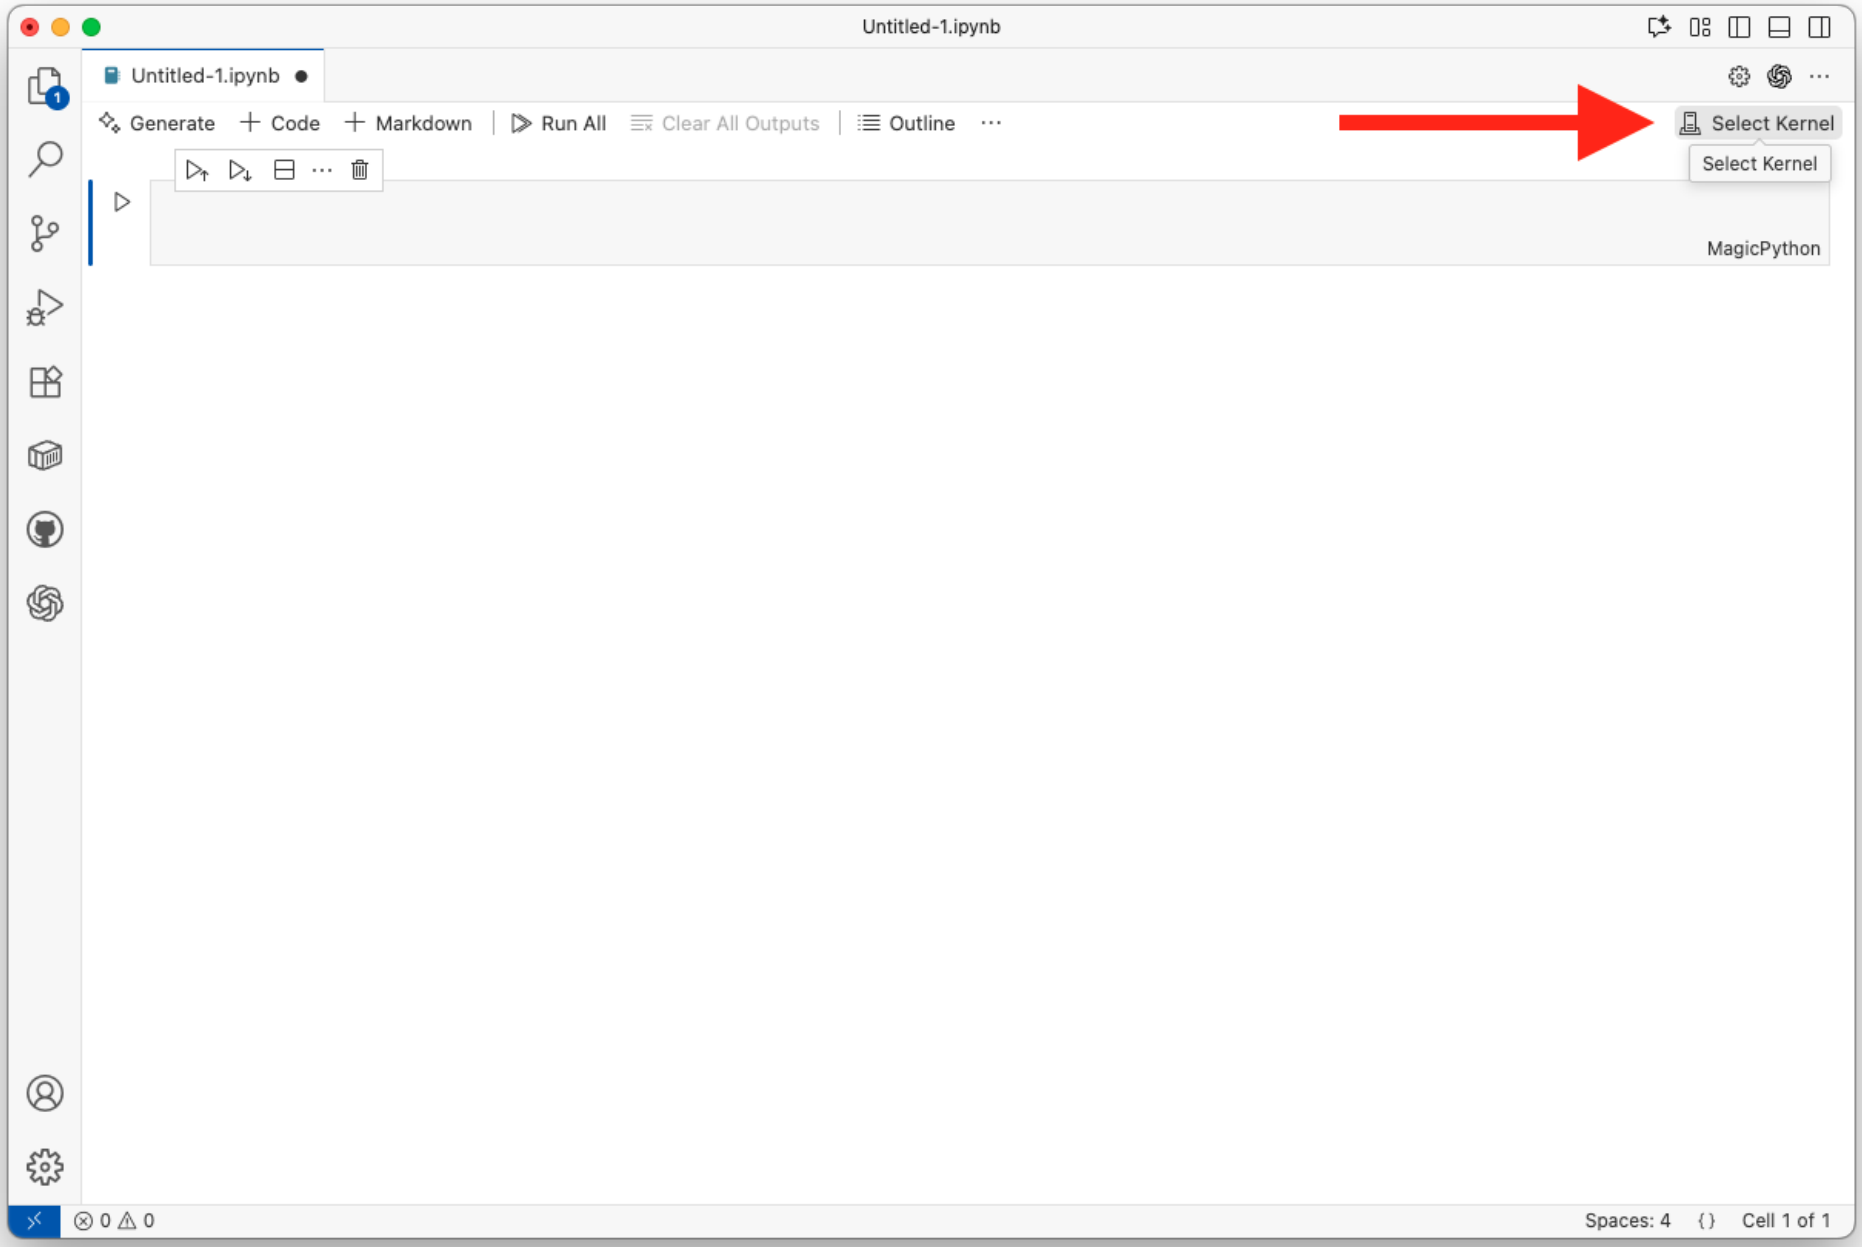
Step 1. Open VS Code

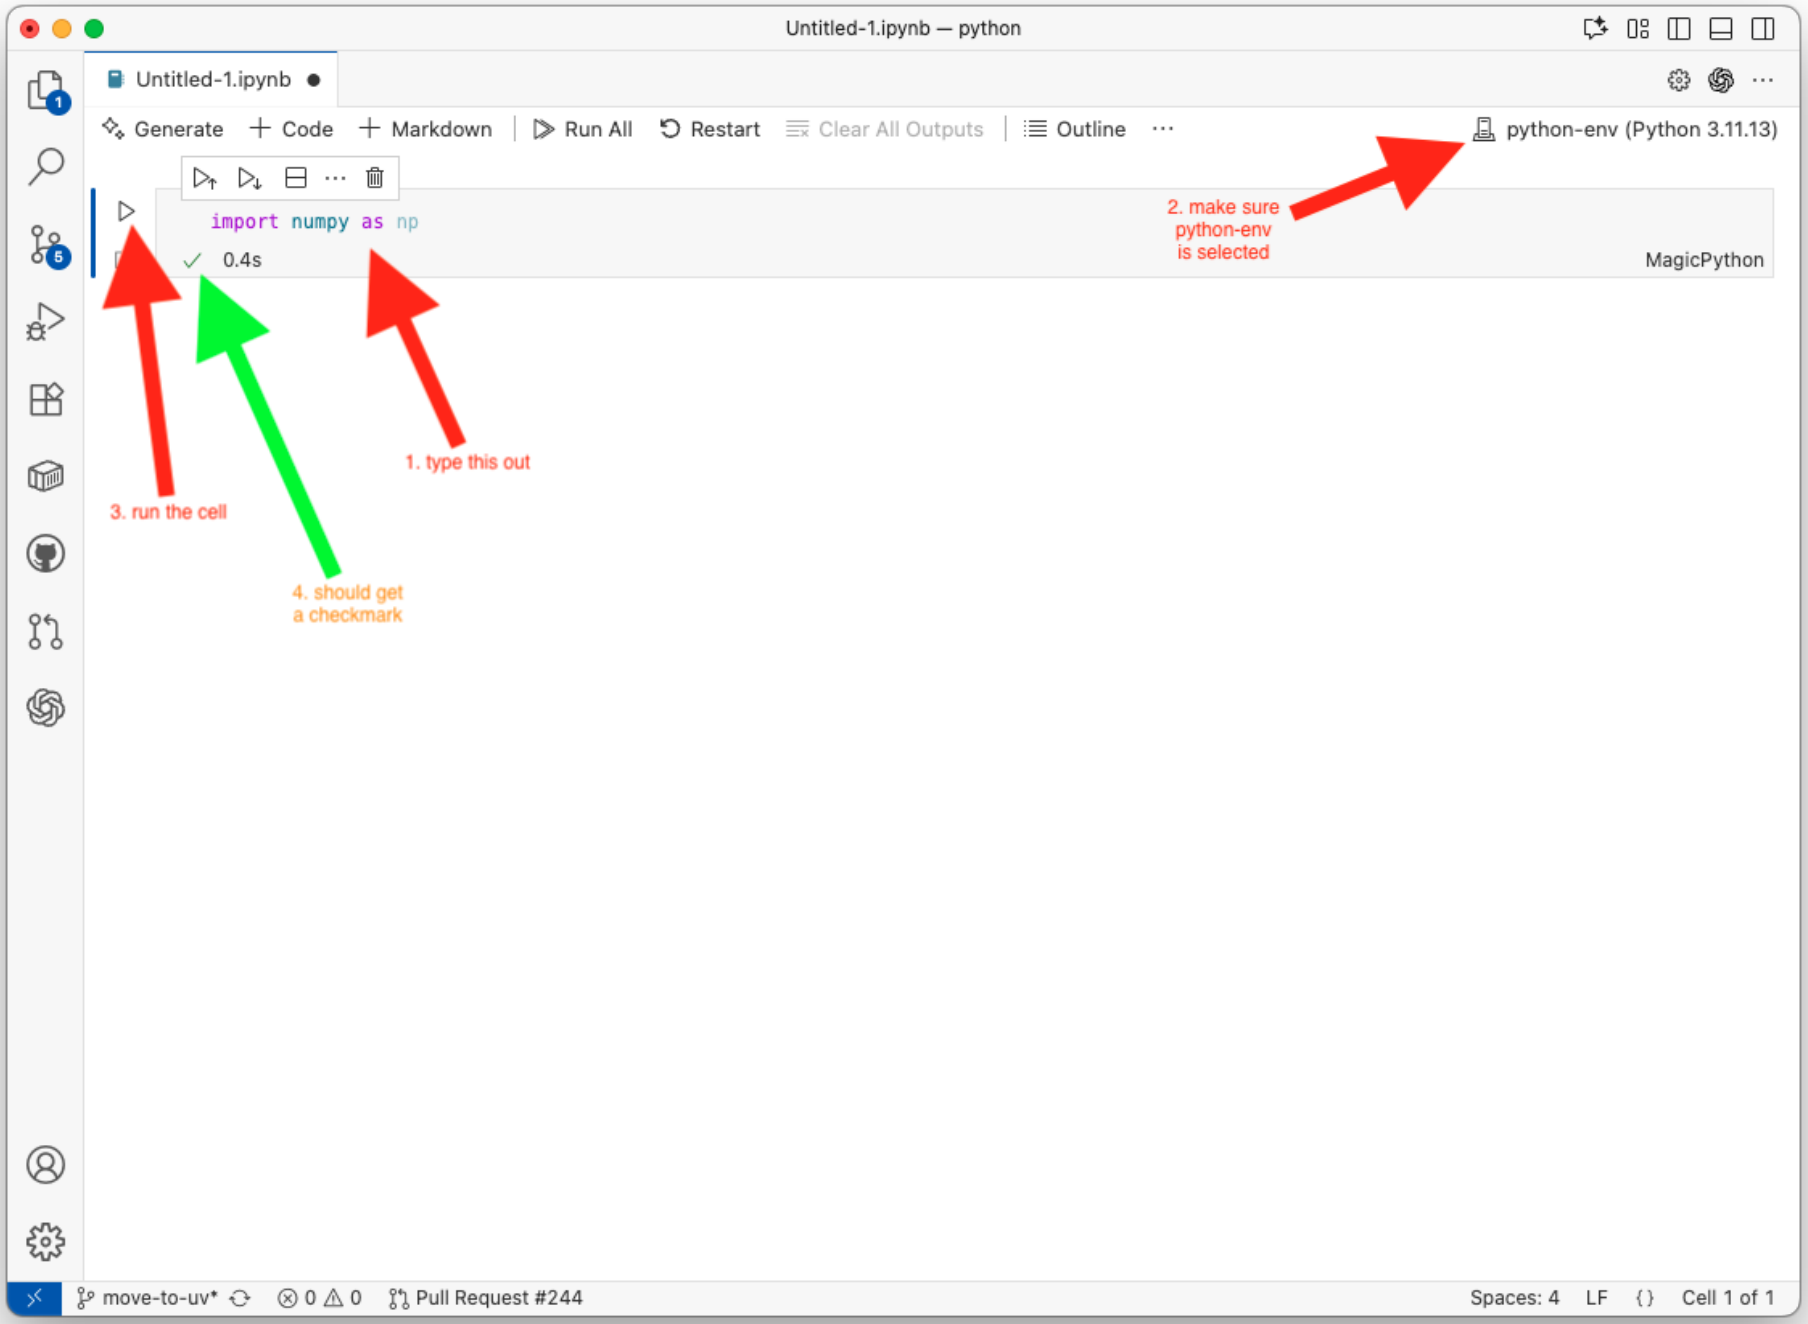


Step 2. Create or Open a Notebook



Step 3. Select the Kernel





Step 4.
Verify the Kernel
